Claronden Poll Dorsets

Poll Dorsets

Claronden Poll Dorsets have been bred over many generations to produce big early lambs. We are very proud of our client's success presenting good lambs that return top dollar at the early sucker lamb markets. Once again, our clients topped the Hamilton market on numerous occasions, with the standout result being a line of lambs from Waratah Pastoral. On the 21st of November, 2018. These lambs broke the saleyard record, making \$280, which is a fantastic result for sucker lambs.

Poll Dorset's are known for early lambs, and the Claronden Poll Dorset stud breeds to these strengths. We have specifically bred our Poll Dorset rams to have exceptional early growth. This gives our clients the ability to convert the peak growth period of spring, into a quality finished product before the season cuts out.

The combination of using sires that have been outstanding lambs themselves, have top end lamplan figures (with emphasis on weaning weight}, and plenty of length and shape, means all bases are covered.

Other useful traits of the breed include. -Thicker skins which give superior survival as new born lambs in adverse weather conditions. – Pure breed, that leave an even line of progeny when mated to composites. -Provide optimum fat cover that is favoured by processors.

Charollais

We have been crossing Charollais rams over our Poll Dorset ewes for a few years now and have found that the first cross rams have been a popular option for prime lamb producers, with some very positive feedback coming from the early users.

The Charollais breed offer exceptional carcasses, easy lambing and rapid early growth rates and when combined with our high performing Poll Dorsets, we get a ram that gives added options. They provide the opportunity to produce quality lambs out of young ewes and merinos, as they are born smaller, and are quick to get up and suckle. They are less selective feeders, are easily finished at lower weights and hold onto their condition in the drier months. These factors lead us to believe that they are a superior easy lambing option.

All rams have been vaccinated for OJD with the Guidar vaccine and are brucellosis accredited. For any enquiries on the rams, please don't hesitate to call Aaron Pascoe, ph 0427 220190.

Legend

Ebv	estimated breeding value
Bwt	birth wt ebv
Wwt	weaning weight ebv (recorded 24/08/2018)
Pwwt	post weaning weight ebv
Pfat	post weaning fat depth ebv
Pemd	Post weaning eye muscle depth ebv
(twin)*	born twin, reared as single
(triplet)*	born triplet, reared as twin or single
Actuals	raw data scanning measurements (recorded 3/12/2018)
